

Abstract for “Issues Related to the Introduction of ESA 2010 in Europe”

Gallo Gueye (Eurostat)

Jens Gruetz (Eurostat)

The paper will present the work carried out in Europe in order to prepare for the application of the major methodological changes introduced by ESA 2010 in line with SNA 2008. This includes the treatment of R&D expenditure, pension entitlements and goods sent abroad for processing, etc. Where possible, the implementation of these changes will be illustrated with actual data from countries as well as international comparisons.
