

Abstract for “Loose Ends in the International Standards for National Accounts”

Robin Lynch (Private Consultant)

The paper covers a number of topics which are an important part of the implementation of SNA 2008. The paper reflects the author's experience in working on implementation issues in Europe. Issues discussed will include the capitalisation of R&D, the border-line between market and non-market activities, price and volume estimates for individual government services, moving to the new basis for goods sent abroad for processing, and other topics.
